

## Module 5 Instructions

1. Use the FAST maze module. Align the arrow on the baseplate with the 270 position on the module.

### **Maze**

Using your LEFT hand, place the camera in the left portal and the probe in the right portal. Use the probe to work the large ball bearing through the maze. Repeat the task with the camera in your RIGHT hand. Perform the number of trials necessary to complete the task in LESS than 139 seconds.

- For increased difficulty try using smaller ball bearings!
